

# AJAL RAJAN

## SOFTWARE DEVELOPER

### ABOUT MYSELF

I am a motivated individual with in-depth knowledge of languages and development tools, seeking a position in a growth-oriented company where I can use my skills to the advantage of the company while having the scope to develop my own skills.

### EXPERIENCE

#### NGXP Technologies | Software Developer

##### .NET Developer

- Collaborated with a team of developers to design and develop web applications using various programming languages and frameworks.
- Participated in the full software development life cycle, including requirements gathering, design, coding, testing, and deployment.
- Implemented new features and enhancements to existing applications, optimizing performance and improving user experience.

### PERSONAL PROJECTS

#### Recruitment App

The Recruitment App is a powerful and user-friendly web application developed using Django, designed to streamline and optimize the recruitment process for businesses of all sizes. With its intuitive interface and robust features, the app aims to simplify the hiring process, attract top talent, and efficiently manage candidates throughout the recruitment lifecycle.

#### Job Fair

The job fair project aimed to create a comprehensive platform for job seekers and employers to connect and interact during a virtual job fair. I developed essential features for candidates, including registration, login, a dashboard, and a curated list of available companies.

#### Wave App

Currently in the development phase of the Wave Application, an accounting invoice web app. The application provides a user-friendly interface for creating professional-looking invoices and managing the financial aspects of a business.
