## PROJECTS

**HumanLife | Hospital Management System Web Application**
**Technology Stack: Next.js, TypeScript, Tailwind CSS, MobX, REST APIs, Node.js, Express.js i18n, Git**
HumanLife is a hospital management system web application designed to streamline administrative operations, enhance patient care, and doctor's availability. The platform provides a solution for managing patient records, doctor schedules, appointments, and billing.

**Rent Meld | Property Leasing Web Application**
**Technology Stack: Next.js, TypeScript, Tailwind CSS, MobX, REST APIs, Node.js, Express.js, i18n, Git**
Rent Meld is a property leasing web application designed to simplify the management of rental properties, leases, and tenant communications. The platform provides property managers and tenants with intuitive tools to efficiently handle lease agreements, rent payments, and maintenance requests.

**Compreg| Race Event Hosting & Registration Web Application**
**Technology Stack: MERN, Redux, Material UI, Prisma, i18n, GitHub, REST APIs, Node.js, Express.js**
Compreg is an event hosting and race registration platform with three key modules: Admin, Organizer, and Participant. It streamlines event creation, management, and tracking for organizers, while enabling participants to register, view schedules, and track event statuses through an intuitive interface.

## EDUCATION

**APJ Abdul Kalam Technological**
B.Tech, in Information Technology | Viswajyothi Collage of Engineering and Technology | 2015 - 2019
